Ceratherm T & FirmaFlow® Therm

# POWERING THE EVERYDAY

Ideal Standard's Ceratherm T collection performs beautifully, because we design every model from the inside out. Thanks to the hidden brilliance of FirmaFlow® Therm, you can enjoy unrivalled levels of durability, safety and performance – with an ergonomic design that delivers, day after day.

FirmaFlow® Therm

# HIDDEN BRILLIANCE SINCE 1969

**The original, perfected.**

We invented the ceramic disc cartridge for taps over 50 years ago, revolutionising the bathroom experience.

Since then we've been perfecting our technology and innovating new ideas – like FirmaFlow® Therm.

This new innovative thermostatic cartridge for shower systems offers unrivalled quality, durability and performance.

We wanted the Ceratherm T range to perform brilliantly, yet be as slim as possible. To achieve this we developed FirmaFlow® Therm, a revolutionary smaller thermostatic cartridge. It provides safety and efficiency, while enabling us to create a streamlined design, ideal for any bathroom project.

FirmaFlow® Therm

# PERFORMANCE THAT GOES ON AND ON

It's not by chance  
that Ceratherm T  
delivers, time  
after time.

Made from limescale-resistant  
polymer and with a fine strainer  
mesh welded on, FirmaFlow®  
Therm is designed to power  
every product in the range over  
a long, problem-free service life.  
Making Ceratherm T the right  
choice for both high- and  
low-traffic environments.

FirmaFlow® Therm

# ENGINEERED TO LAST

Easy to maintain  
and extensively  
tested.

Thanks to the incredible durability of FirmaFlow® Therm, performance is assured, year after year. When maintenance is required, we've made sure components are easy to source and replace.

For example, we use a single cartridge for all our mixers – including bath mixers – reducing the time it takes to locate the right parts and saving you money.

FirmaFlow® Therm

# EFFICIENTLY ENJOYABLE

Reduced Consumption

Less water, less energy.  
More power to you.

Our integrated controls reduce waste in a number of ways when compared to traditional lever faucets.

The efficiency of FirmaFlow® Therm ensures target temperatures are reached far quicker, saving energy. The eco-setting allows you to limit flow up to 50% without any loss of performance. And our Idealrain handspray is fitted with a flow restrictor to provide maximum water efficiency.

Water consumption matters – that's why we don't waste a single extra drop. The water temperature in our thermostatic mixers is preset and remains constant during use. And the thermostatic mechanism automatically controls the warm and cold water flows, helping you to save water.

These innovations not only reduce water consumption but improve the delivery of every drop. At a time when water is recognised as an increasingly valuable resource, they are part of our commitment to preserving it through everyday life.

Ceratherm T

# POWERING A SAFER SHOWER

The technology behind Ceratherm T isn't just smart, it's safe – making it the perfect choice for all applications.

Cool Body

Cool under  
pressure.

Whatever your preferred temperature, Ceratherm T stays cool to the touch. The entire range uses Cool Body technology to ensure the hot water flow is always surrounded by cold water, protecting users of all ages from scalding, and offering total comfort of use.

## Temperature Control

Just right,  
every time.

A perfect bath or shower has to be the perfect temperature. FirmaFlow® Therm allows installers to preset a desired temperature level. You can also choose to set a maximum limit, which can be altered with the push of a button.

Should the hot or cold water supply unexpectedly cut off, FirmaFlow® Therm will automatically stop the shower to protect from shocks and scalds – restarting under your control when the water supply returns.

1. Cold water chamber
2. Hot water inlet
3. Mixed water
4. Cylindrical, chrome plated brass body
5. Ergonomical handle
6. Standard fixation with S-connectors
7. Escutcheons with fully hidden fixation for some models
8. FirmaFlow® Therm
9. Ceramic disc valve with life cycle of at least 500.000 on/off cycles

Ceratherm T

# DESIGNED TO IMPRESS

Compact

Precision  
performance.

By refining the hidden brilliance of FirmaFlow® Therm we've been able to make the Ceratherm T body slimmer and more compact than ever before. Creating a shower that makes a stylish addition to any space.

Ergonomic

Total control.

With buttons and controls that blend seamlessly into the Ceratherm T's body, the flow and temperature of the water can be adjusted with the touch of a finger. A built-in diverter effortlessly switches between different outlets and a range of accessories – including hand sprays and ergonomic shelving options – offer even greater choice and control.

Ceratherm T100 – Thermostatic Shower Mixer with Idealrain EVO JET Diamond Showerkit 90cm / Strada – Shower Tray 120x80cm, White / Connect 2 – Sliding Door 117x61cm / Connect 2 – Side Panel 77cm

Ceratherm T

# VERSATILE FITTING

Easy to install

Ready to go.

Precalibrated in our factory, and with a streamlined design, common connections and adjustable fittings, Ceratherm T can be installed easily in almost any location.

The adjustable bracket allows for installation to cover existing holes, and the sleek form and hidden fixation makes it easy to achieve and maintain a clean finish.

- 1. Ceratherm T100 concealed fixture
- 2. Moveable wall bracket

Ceratherm T

## ELEVATE THE EXPERIENCE

Beautifully designed and built to perform, our diverter mixer shower and handsprays are the perfect partners to our FirmaFlow® technology. Working together to deliver an unrivalled shower experience, day after day.

The Idealrain range effortlessly complements our thermostatic diverter mixer shower systems.

EVO has an aerated spray mode. While EVO JET features Drop Jet, a unique pattern from Ideal Standard, creating larger, softer droplets for added luxury. Using the Navigo® push button located on the handspray, switching between modes couldn't be easier.

Our diverter mixer showers are easy to fit, perform brilliantly and deliver design choices suitable for any bathroom.

## FROM INVIGORATING TO RELAXING

### Idealrain spray modes

There's a choice of varying spray modes to match your mood.

#### DROP JET

The luxurious EVO JET model spray uses Drop Jet technology – a unique pattern from Ideal Standard – to create softer water droplets.

#### MASSAGE

An invigorating spray that refreshes and revitalises.

#### RAIN

A relaxing downpour created by edge-to-edge nozzles.

#### AERATED RAIN

An EVO model spray that sucks air into the water for a gentler, cleansing experience.

#### FINE RAIN

A gentle but generous spray that cleanses and calms.

3 SHOWERING FUNCTIONS

3 spray modes for a great showering experience.

MAXIMUM SPRAY

The edge-to-edge nozzle design maximises spray.

Together we positively impact the future of modern living. Together we think bigger. Together we establish the rules for considered design. Together we bring emotion to functional perfection. Together we form enduring partnerships. Together we meet the needs of all generations. Together we shape the future of the category we have defined.

Together for Better.
